

To the attention of the REACH Compliance department

Subject: REACH regulation and PFAS restriction proposal

Carignan, August 10, 2023

Dear Customer,

The 7th of February 2023, ECHA has published a new proposal, concerning a global ban on per- and polyfluoroalkyl substances (PFAS), which targets approximately 12,000 substances and is expected to enter into force in late 2026/early 2027. Out of those 12,000 substances, some of our catalog articles have a high chance of containing PFAS, or have been manufactured with the help of PFAS. Investigation is ongoing with our suppliers to detect PFAS and find suitable, iso-performing alternatives. Hereafter, you will find a list of part numbers manufactured by Amphenol Air LB FRANCE that have been determined to make use or contain substances that are likely to be banned in the PFAS restriction plan.

All the following references are most likely to contain PFAS:

- **Modules for SIM II (EN4165), 1900SIM connectors families**

Modules for crimped contacts:

AALBF references: SIM X XXXX X X X Modules

With straight/angled PCB contacts:

AALBF references: SIM X XXXX X X X X

Gigabit & ARIC 600 modules:

AALBF references: SIM X 1602P/S X X (BR)

Grounding modules:

AALBF references: SIM EG/MG 0128 X X X

Shunt modules:

AALBF references: SIM EZ/MZ XXXX P X

- **Specific Modules for SIM III**

Grounding modules – socket:

AALBF references: SIM 3 EG/MG 01X8 X S X

Detailed documentation on modules and part numbering system is available online for download:
